PROFESSIONAL SUMMARY

MSc Computing (Data Analytics) graduate from Dublin City University (2:1) with over two years of experience in data validation, production support and enterprise banking applications at Societe Generale. Experienced in turning business requirements into practical data and technology solutions using SQL, Python, Power BI and Excel. Combines a technical background with hands-on commercial experience running an e-commerce business, and a strong interest in data governance, analytics and responsible AI.

TECHNICAL SKILLS

- **Data and analytics**: SQL/PostgreSQL, Python, Power BI, advanced Excel, PySpark, ETL workflows, KPI reporting, data validation, data quality management
- **Technology**: Azure, AWS, Docker, Git, Linux, Jira, Confluence, Postman, Terraform, Kubernetes, Jenkins
- **Ways of working**: UAT, requirements gathering, incident management, root cause analysis, technical documentation

EDUCATION

Dublin City University Dublin, Ireland
Masters in Computing (Data Analytics) | Grade: 2:1 Sept 2025 - Aug 2026
Modules: Advanced Machine Learning, Statistical Modelling, Big Data (Spark/Hadoop), Cloud Technology, GDPR and Ethics
Dissertation: Automated Software Vulnerability Detection using Explainable AI. Applied CodeBERT and GraphCodeBERT to 116,000+ samples from the Juliet Test Suite, focusing on classification accuracy and explaining model decisions

Dayananda Sagar Academy of Technology and Management Bengaluru, India
B.E. in Computer Science Engineering | GPA: 8.5/10.0 (First Class Honors equivalent) June 2019 - June 2023
Modules: Data Structures and Algorithms, Linux, Object-Oriented Programming in C++, Database Management Systems, Operating Systems, Computer Networks
Final-year project: published in the International Journal of Research and Analytical Reviews (IJRAR), May 2023

PROFESSIONAL EXPERIENCE

Primark (Penneys) | *Retail Assistant* Nov 2025 - present
Dublin, Ireland

- Serve customers in a busy, high-volume store, answering queries and resolving issues calmly while keeping service standards high at peak times
- Work as part of a team to keep the shop floor organised and well presented, with attention to detail on stock and displays

Societe Generale Global Solution Centre | *Analyst (DevOps)* Aug 2023 - Aug 2025
Bengaluru, India

- Resolved 25+ production incidents and application issues weekly in a live banking environment using SQL, Linux and log analysis, keeping management, users and technical teams updated until closure
- Carried out root cause analysis on recurring issues with infrastructure and development teams to reduce repeat incidents
- Gathered requirements from business process owners and technical stakeholders, then prepared test cases and ran functional testing, UAT and defect management
- Validated data using SQL to protect data accuracy and quality across enterprise applications
- Supported deployments, batch processing, configuration changes and integrations, with business impact in mind
- Wrote SOPs, troubleshooting guides and knowledge-base articles in Confluence and Jira so teams could resolve issues faster
- Built and maintained Java, Spring Boot, React and Angular applications, including RESTful APIs and data access layers.

Societe Generale Global Solution Centre | *Data Analyst Intern* May 2023 - July 2023
Bengaluru, India

- Built a machine learning solution that monitors website logs and raises alerts before failures occur, using IDF-weighted log vectors and hierarchical clustering.
- Developed a Flask app showing predicted faulty logs with a feedback loop for continuous improvement.

Tequed Labs | *Full stack Intern* Aug 2022 - Sept 2022
Bengaluru, India

- Built several full stack web projects, creating the front end with React, HTML, CSS and JavaScript and the back end with RESTful APIs in Python.
- Stored and queried data using MySQL and MongoDB, and optimised SQL queries to improve data retrieval.
- Connected the front end to the APIs and databases, and tested each project end to end.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900), Jun 2026
- ITIL 4 Foundation, Jul 2025
- DataCamp: Introduction to Power BI, Time Series Analysis in R, ARIMA Models in R, Regression with statsmodels in Python
- Google Data Analytics Certificate
- McKinsey.org Forward program, Jun 2026

PROJECTS

Responsible AI: Automated Software Vulnerability Detection using Explainable AI 2025 - 2026

- Developed CodeBERT and GraphCodeBERT models on 116k+ code samples to detect software vulnerabilities, and applied attention-based explainable AI techniques to interpret predictions and highlight vulnerable code regions.
- Evaluated machine learning and transformer-based approaches using standard classification metrics, and ran user studies to assess explanation quality.

Medical Image Classification System 2022 - 2023

- Developed a CNN to classify MRI scans for brain tumour detection (published in IJRAR, May 2023) and integrated it into a Flask web application for image upload and prediction.
- Performed model validation, testing and evaluation using standard performance metrics to ensure reliability and accuracy.
- Link: https://ijrar.org/papers/IJRAR23B2397.pdf

EXTRA-CURRICULAR ACTIVITIES

- Student union ambassador and volunteer at college events, including graduation, supporting event delivery and welcoming visitors
